It is with great pleasure that I write this letter of recommendation for Meira Gottlieb. I have worked with Meira for the past three years, during which time she has impressed me and all our colleagues with her high degree of skills in technology and her capacity to communicate them and teach them to other teachers as well as students.

Meira is extremely knowledgeable in her field and brings a wealth of experience and the most current technological skills to her teaching. As the Tech Integration Specialist at the Anglo American School of Sofia, she worked at the school level implementing new technologies and helping teachers use them with ease by setting up online tutorials for programs like Google Classroom, Doctopus and Haiku. Understanding that many of us need more support, she also went out of her way to set up meetings with individual teachers and walk us through the steps.

In her role as the Integration Specialist, she was also available to help teachers when they reached out to her for ideas or help on individual projects. She is quick to respond and has gone out of her way to answer questions and research programs that have been helpful for me and also for my students. In my own 7th and 8th grade math classes, Meira introduced me to or supported me with a number of programs including Explain Everything, Mirror 360, Sketchup, and classroom blogging. Not only does she show me how to use these programs, she also makes me excited to try them out.

Meira is not only an excellent colleague and coach, but she has also impressed all of us with her teaching skills. Her video production and graphic design classes are amongst students consistent favorites. When I've had the privilege of watching her in action, I've been impressed with her ability to integrate direct instruction including online tutorials that she's created herself while having student have the creative freedom to explore new programs within a blended classroom. Their work samples, which they display each trimester during assemblies, are always a highlight.

It has been my utmost pleasure to work with Meira Gottlieb and I sincerely hope to have the opportunity to work with her again. As a colleague and recipient of her support, I cannot recommend her highly enough. If you have any questions, please do not hesitate to contact me.

Best Regards,

Joshua Pabalate
7th and 8th Grade Math Teacher
